## QUIT SMOKING

Smoking can increase your risk of stroke by as much as 3 times.

Quitting smoking is the most important thing you can do for your health.

## **SMOKING CAN:**

Reduce the amount of oxygen in your blood

Make your heart work harder

Increase your risk of blood clots

## WHAT YOU CAN DO

It's **never too late** to quit smoking.

Pick a quit date in the next 30 days.

**Start cutting down** the number of cigarettes you smoke today.

## WAYS TO HELP DURING YOUR QUITTING PROCESS:

**Talk to your doctor** about medications and aids to help you quit smoking

Remove any tobacco products from your home/environment (lighters etc)

**Reach out for support** (friends, groups, one on one, online forums)

Stay focused on your goal and the benefit to your health

**Stay motivated** knowing the amount of money you can save

If at first you don't succeed, **keep trying** 

Anticipate triggers and have a plan to deal with cravings by:

Going for walks

Taking deep breaths

Distracting yourself (talk to a friend, play a game)

TALK TO YOUR HEALTHCARE PROVIDER ABOUT QUITTING SMOKING.
